Deadline for manuscript
submissions:

15 April 2020

Message from the Guest Editors

This Special Issue will report on recent breakthroughs in instrumentation and new applications in this exciting field that extends from lithium batteries to studies of cultural heritage, and from biomedical engineering to nuclear materials.

Keywords:

- Compact neutron sources
- Fast neutron imaging
- Neutron focusing optics
- Polarized neutron imaging
- Neutron imaging for energy applications

Message from the Editor-in-Chief

The imaging term, specific with journal, is to be considered in its broadest sense. Image processing, image understanding and computer vision are all terms related to imaging acquisition, its processing and the extraction of relevant information from the scene to obtain the underlying knowledge. All tasks related to the above items are oriented toward specific applications in a broad range of areas and topics. The *Journal of Imaging* is conceived as an efficient vehicle in the scientific community for the communication and transmission of the progress and research results in the topics covered.

Author Benefits

Open Access: - free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), Inspec (IET) from Vol. 3, in the DBLP Computer Science Bibliography and in **Scopus**.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 19.3 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the first half of 2019).
