4 - 8 September 2023

Data manipulation and handling skills are becoming more important in neutron scattering. This summer school will introduce the cutting-edge concepts and software required to understand neutron scattering data. The material will be taught through a series of talks and hands-on workshops led by ESS staff.

The workshop will take place in Copenhagen at the Data Management and Software Centre and the historic Niels Bohr Institute, and will include a day in Sweden at the ESS facility in Lund.

Free to attend but spaces are limited. Accommodation, lunches and social activities are included. Apply using the link or QR code.
